

Uninstalling NDT

Start

Right click on the Start button

Find the directory in which you installed NDT. The default is C:\Program Files\Thermo Niton.

Select the directory name.

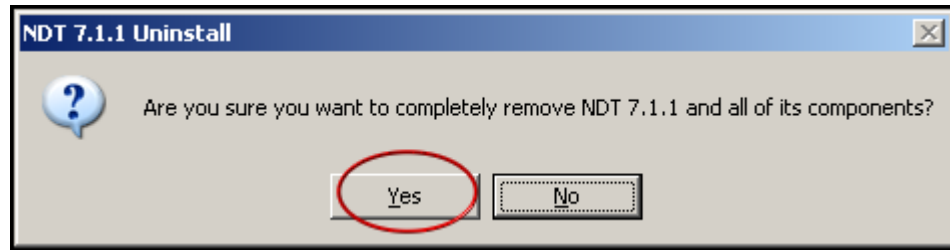

Open the NDT folder

Uninstalling

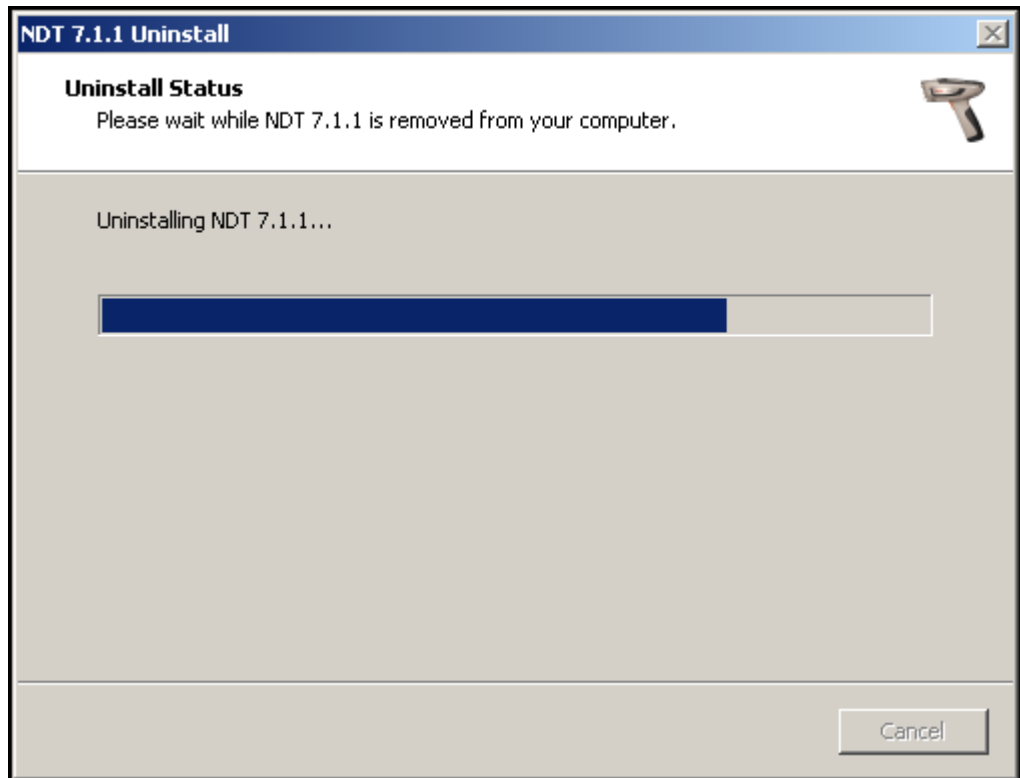

Double click on the unin000.exe icon.

Select the Yes button when asked if you are sure you want to remove NDT.

A status bar will show while the NDT components are removed from your computer.

Click the OK button when the uninstall is completed.
